

SCENIC FLIGHT INSIGHT

mackair

Planning is key. Here's what to expect.

As a standard, our scenic flights are **one hour**, either in the **early morning or late afternoon**.

Before you depart from Maun, your pilot will brief you on what to expect during the flight; the area's you will visit and what you will see. All these change season to season and no flight is the same. After the short briefing, you will embark your aircraft and venture North, into the **Okavango Delta**.

We've marked our '**general scenic area**' - on the map to the right.

BRING YOUR CAMERA

Whilst the **Okavango Delta** boasts magnificent scenery, our scenic flights are only 150m above the ground and the possibility of seeing wildlife is high.

The wild is unpredictable, and we never know which gems you will uncover, but common sightings include **roaming elephants**, **journeys of giraffe**, **wallowing hippos** and **great fields of Buffalo**. Less common are the **ever-elusive predators** but lucky passengers do spot them from time to time.

"Journey with us to discover the lush scenery of the **Okavango Delta** from above"

ONLY THE BEST

Mack Air operates various light aircraft, the majority of our fleet being **CESSNA's GRAND CARAVAN EX**. These aircraft are primarily used to charter our passengers to and from these destinations, in the **Okavango Delta** and as far as surrounding countries. **Safety is a priority** and has been, since 1994, when Mack Air was established.

For our scenic flights, we limit our total number of passengers per aircraft from 12, to only 9, ensuring everyone has a window seat. These aircraft are also **airconditioned** for your comfort. Local air temperatures can reach above 38°C (100°F).

RESERVE YOUR SEAT

Booking is simple

If it's last minute last minute, visit office directly or call our landline: **+267 686 0675**.

In advance you may email: reservations@mackair.co.bw
